What is RSNA?

The Radiological Society of North America (https://www.rsna.org/) (RSNA®) is a nonprofit organization that represents professionals spanning the full breadth of radiologic subspecialties in more than 160 countries around the world.

We provide high-quality educational resources, including continuing education credits toward physicians' certification maintenance, host the world's largest radiology conference and publish six top peer-reviewed journals: *Radiology*, *RadioGraphics*, *Radiology: Artificial Intelligence*, *Radiology: Cardiothoracic Imaging*, *Radiology: Imaging Cancer* and *Radiology Advances*.

We are dedicated to building the future of our profession, whether that's through our Research & Education Foundation, which has funded $88 million in grants since its inception, our solutions to support standards development or educational outreach to low-resource nations.

For more information about the Society, visit the RSNA website at https://www.rsna.org (https://www.rsna.org/)

Disclaimer

This information is copied from the RadiologyInfo Web site (http://www.radiologyinfo.org) which is dedicated to providing the highest quality information. To ensure that, each section is reviewed by a physician with expertise in the area presented. All information contained in the Web site is further reviewed by an ACR (American College of Radiology) - RSNA (Radiological Society of North America) committee, comprising physicians with expertise in several radiologic areas.

However, it is not possible to assure that this Web site contains complete, up-to-date information on any particular subject. Therefore, ACR and RSNA make no representations or warranties about the suitability of this information for use for any particular purpose. All information is provided "as is" without express or implied warranty.

Please visit the RadiologyInfo Web site at **http://www.radiologyinfo.org** to view or download the latest information.

Note: Images may be shown for illustrative purposes. Do not attempt to draw conclusions or make diagnoses by comparing these images to other medical images, particularly your own. Only qualified physicians should interpret images; the radiologist is the physician expert trained in medical imaging.
